To Whom it May Concern

RE: CATHERINE PANTAZOPOLOUS

I have had the pleasure of working with Catherine at DKP over the past year. I found Catherine to be extremely talented, and amenable. She tackled every task with enthusiasm and professional diligence. Her knowledge of languages was a definite asset particularly in the Montreal market.

Catherine's base strength is her keen eye. She can balance colours and extract images from a film negative with great proficiency. She has an acute knowledge of film scanning techniques, and data colour correction. She sees images in a different way from most people and the end result is always spectacular.

Most of all, Catherine is a true professional and a master at her craft. She will excel in any environment that offers her a challenge, and provides her with an opportunity to grow in her craft and develop a high resolution data environment. If you have any questions regarding Catherine, please feel free to call.

Sincerely,

A handwritten signature in cursive script that reads 'Daniel J. Krech'.
